EIGHT VIDEOCADE™ CASSETTES

NEW FROM BALLY

LAS VEGAS, NEVADA: Eight new Videocade™ cassettes from Bally Consumer Products Division are being introduced at the Winter Consumer Electronics Show here.

Used with the Bally Computer System Video Console, the new cassettes bring the total Videocade library to 17, with 36 games.

New cassettes in the Action/Skill Series include 3 video pinball games and Star Battle. Football, Drag Race/Desert Fox™, and Demolition Derby/Grand Prix are included in the new Videocade Sports Series, and Music are being added in the Educational Series. The new cassettes in the Strategy Series are Checkers/Backgammon and Amazin' Maze/Tic-Tac-Toe. In addition, Bally BASIC allows the user to program his own charts, graphs, music, and video games. Additional Videocade cassettes will be offered on a continuing basis, including programs for home finances, business, education, and the arts.

Suggested retail prices for the Sports, Action/Skill, Educational, and Strategy Series cassettes are $19.95 to $24.95; Bally BASIC is $49.95.

FOR IMMEDIATE RELEASE

GRAFIX™ PROGRAMMING LANGUAGE HIGHLIGHTS BALLY COMPUTER INTRO

LAS VEGAS--A custom computer programming language featuring words, symbols, music and graphics was introduced at the Winter Consumer Electronics Show here by Bally Consumer Products Division. Called GRAFIX™, the new programming language was developed by Bally for use in its new Bally Computer System.

A decade in development, the new language is the offspring of Bally BASIC and GRASS, the graphics language used to create the special computer effects in the movie "Star Wars".

GRAFIX™ is described by Bally as the first graphic computer language designed specifically for consumers. Utilizing the full 256-color capability of the Bally Computer System, the language offers home programmers many unique features:

. The language is self-teaching. Programming commands describe themselves to users upon request, with the simple instruction "help!".

D'Arcy-MacManus & Masius, Inc., 200 East Randolph Drive, Chicago, Illinois 60601 (312) 861-5000
Bloomfield Hills (Detroit), Chicago, Cleveland, Los Angeles, New York, St. Louis, St. Paul, San Francisco
Adelaide, Amsterdam, Auckland, Brisbane, Brussels, Copenhagen, Hamburg, Helsinki, London, Melbourne, Mexico City, Milan, Oslo, Paris, Pretoria, Stockholm, Sydney, Toronto, Vienna, Zurich

. The language is also extensible, i.e. expandable by users. Although the language contains instructions common to BASIC, it also contains a vocabulary of graphic commands that are unique. And, an infinite number of new commands can be added by the home programmer. "Whereas BASIC programs with numbers, GRAFIX programs with words," explained Bob Wiles, General Manager of the Bally Consumer Products Division.

. The language also permits multi-level programming, according to Wiles. This feature allows users to write one program while running another, in effect allowing a limitless number of independent programs to operate on the screen simultaneously.

Applications for the new programming language "boggle the imagination," said Wiles. He cited commercial art, computer movies, flight simulation, and classroom instruction as "just a few of the infinite software possibilities for GRAFIX."

GRAFIX was developed by a Chicago-based team of programming engineers--Dr. Tom DeFanti, Professor of

Computer Sciences at the University of Illinois; Nola Donato, a University of Illinois programming consultant; and Jay Fenton, Senior Programming Engineer with Dave Nutting & Associates, a Bally subsidiary.

For Immediate Release

THE BALLY COMPUTER SYSTEM

DEBUTS AT WINTER CES

LAS VEGAS, NEVADA: The Bally Consumer Products Division's three-level Bally Computer System debuts here at the Winter Consumer Electronics Show, January 6-9.

The forerunner of the computer system, the Bally Professional Arcade™, has been incorporated into the system as Level I -- The Bally Computer System Video Console. Containing the exclusive, built-in Bally Brain™, a powerful microprocessor, the Console has a memory bank of more than 12,000 instructions... with up to 8,000 additional bytes in each optional Videocade™ Cassette.

Also built into the system are a 5-function, 10-memory calculator, 256 color variations, stop-action pause control, and automatic shut-off. The unit is available in 2-player or 4-player models and has a 16,000-dot picture image to provide outstanding resolution. With three arcade games and a 24-key calculator built-in, the 2-player model has a suggested retail price of $299.95; the 4-player model, $329.95.

The Computer System Level II adds the Bally BASIC programming cassette and Bally Audio Cassette Interface to the Console.

(MORE)

Bally BASIC, a self-teaching programming cassette, is an easily understood version of the BASIC computer language. It enables users to create their own games, art, and electronic music. Complete with keypad overlay with words, symbols, numbers, and letters, Bally BASIC has a 3-octave range music synthesizer and complete color capability. Suggested retail price is $49.95.

The Bally Audio Cassette Interface enables the user to connect his own cassette tape recorder and gain permanent storage of all programs created. $49.95 is the suggested retail price.

The Videocade Cassette library from Bally features 17 cassettes with 36 games in Action/Skills, Sports, Education, Strategy, and Functional Series. Future Videocades, available on a continuing basis, will expand the unit's applications and usefulness in fields ranging from home finances to art and menu planning.

Level III of the System is the Bally Computer System Programming Keyboard, a 60-key ASCII alphanumeric typewriter-style keyboard that completes the evolution of the System from video game to fully operational home computer. Containing 20K bytes of RAM and 32K bytes of ROM, the complete Bally Computer System (video console and programming keyboard) offers extensive program storage capacity. In addition to BASIC, the machine utilizes a custom graphics language, GRAFIX™, which operates with the System's 256-color output to provide a graphics capability unmatched in the industry. The Programming Keyboard will be previewed to Bally's distributors during the Winter C.E.S.

Bally Consumer Products Division is a division of Bally Manufacturing Corporation, the world leader in leisure time amusement games.

PLEASE NOTE . . .

Bally Consumer Products Division has experienced strong controlled growth in the last year, with 2-step distribution that will be expanded into all 50 States and Canada. The introduction of the new Bally Computer System at the Winter Consumer Electronics Show, including a preview of the System's Programming Keyboard, will enhance Bally's reputation for innovative, top-quality, state-of-the art electronic products.

This Bally Consumer Products Division Press Information Kit contains information, glossy photographs, and captions on Bally's 1979 line of consumer electronic products.

2-player model ABA-1000

FOR 1979, BALLY INTRODUCES

The Bally Computer System

The Level I home computer that's Fun & Brains™!

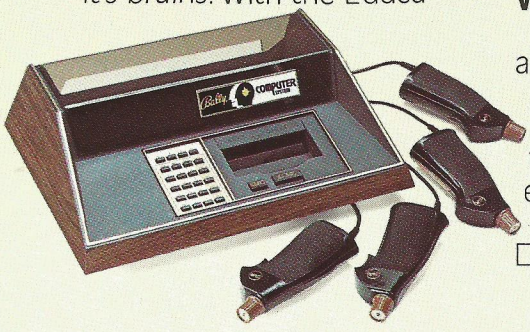
It's the future, today. Its exclusive, built-in Bally Brain,™ a powerful microprocessor, creates a "memory bank" of more than 12,000 instructions. Add up to 8,000 more bytes with each Videocade™ Cassette.

Built into this powerful system are a 5-function, 10-memory calculator, 256 color variations, stop-action pause control, automatic shut-off, 4-player capability and a 16,000-dot picture image that offers outstanding resolution.

Add the optional Bally BASIC programming cassette and the Audio Interface to store programs, and you'll discover that the Bally Computer System offers you the future today.

It's fun. It entertains with three built-in arcade games plus a constantly expanding library of optional Videocade Cassettes.

It's brains. With the Education series of Videocades, it teaches like a school teacher. After it determines the user's ability, it continuously poses more difficult questions to solve.



Video Console 4-player model ABPA-1100

It's instant creativity with Bally BASIC

This programming cassette is an easy-to-understand version of the BASIC computer language to help users create their own games, art and electronic music. With these important exclusives:

- ☐ A self-teaching course that lets users create programs in minutes
- ☐ An easy to use programming keypad
- ☐ A 3-octave range music synthesizer
- ☐ A complete spectrum of 256 colors

Now the Videocade™ library delivers entertainment only Bally can offer.

This library already offers all Bally Computer System owners fascinating Sports, Strategy, Action/Skill, Functional and Education Games. Future Videocade cassettes will expand the unit's applications and usefulness in many fields. And with Bally BASIC, charts, graphs, music and a wide range of additional video games can be programmed. Additional new Videocade Cassettes will be available from Bally on a continuing basis.

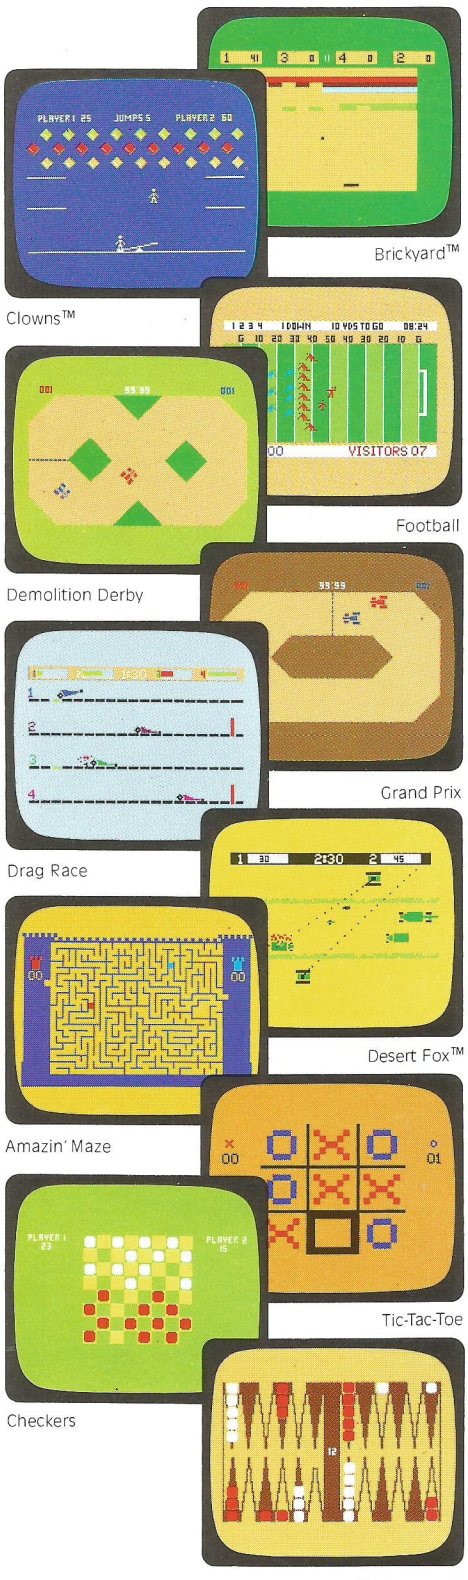
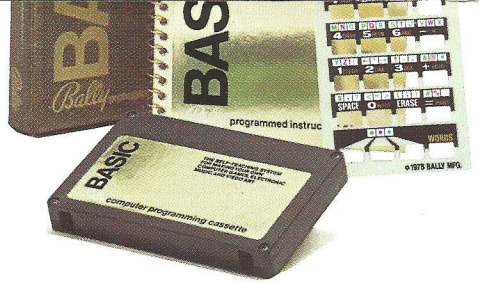
FUNCTIONAL SERIES	6002 — Bally BASIC





Bally BASIC—

The first step in expanding the Bally Computer System

This self-teaching programming cassette puts an entire library of video games, art, music and more, right at the user's fingertips.

It's all-family fun with everything included. Bally BASIC Cassette. Keypad overlay with words, symbols, numbers and letters. Handsome vinyl storage case. And easy-to-follow Computer Programming Course that uses words and pictures to make computer programming fun from the start.

Audio Cassette Interface—

Permanent program storage capability

The Bally Computer System is readily expandable, too. With the Audio Cassette Interface, your customer can connect his own cassette tape recorder and gain permanent storage of *all* the games, art and music he creates!

We took the time to build into the Bally Computer System extra options, ruggedness and power to insure future expansion capability. Bally BASIC and the Audio Cassette Interface prove it.

ELTON CAPTAIN JOHN FANTASTIC

Full-size, commercial-quality home pinball featuring rock giant ELTON JOHN!

- Fully electronic operation for years of family fun
- Large, electronic LED scoring numbers enhance light show effect
- 4-player capability allows for exciting "disco" tournaments
- Adjust difficulty control to player "rock & roll" skill levels
- 8 tones 'n' tunes offer a thrilling rock concert feel
- Diagnostic Check Switch tests functions automatically

Bally brings the excitement home!

ELTON CAPTAIN JOHN FANTASTIC

Licensed by
Captain Fantastic Enterprises, Ltd.

Now your customers can bring home full-size, action-packed PINBALL and rock superstar ELTON JOHN in Bally's new Captain Fantastic™ pinball game.

The pinball sorcery that Elton John created with Pinball Wizard is even more exciting in this latest version. Rock sounds and rock lights help family thrills hit the heights. And it's so easy to set-up, the "concert" action begins only moments after Captain Fantastic arrives.

Bally delivers a Super Star

- Fully electronic operation for years of family fun
- Large, electronic LED scoring numbers enhance light show effect
- Two couples can engage in exciting "disco" tournaments
- 8 tones 'n' tunes sound the way for a thrilling rock concert feel
- Adjust difficulty to player "rock 'n' roll" skill levels
- Exclusive "Game Brain" tallies scores and tells who's the champ
- 22x42" playfield has shatterproof, tempered glass cover for added safety
- Flipper buttons are just 34" from floor so even young "rockers" can go with the action
- Cabinet made of composition wood, leveler legs of steel

Exclusive "Game Brain" and Diagnostic Check Test

The Bally "Game Brain" snaps out for easy maintenance. Only Bally offers solid-state engineering like this, so your customers get years of great family fun.

The Diagnostic Check Switch lets customers automatically test every vital function—even lights—to make sure everything is working properly.

During the 90 day warranty period, Warrantor will provide free, in-home service and will, at its option, repair or replace the equipment, at no cost to the customer. In addition, Warrantor will replace all defective parts for a period of one year from the date of purchase with customer incurring all labor costs after the initial 90 day warranty period.

This warranty does not cover bulbs, fuses, and rubberbands. This warranty does not cover broken glass. In the event of glass breakage, the customer should contact the shipper with regard to the possibility of replacement.

In the event that you desire to obtain performance of any warranty obligation, please contact the dealer from whom you bought the equipment or any Bally Authorized Service Center.

This warranty is void, if repairs are made by other than a Bally Authorized Service Agent, or if the equipment has been misused, carelessly handled or defaced.

When requesting performance under the terms of this warranty, the original purchase date must be established by the customer by means of a bill of sale, invoice, or other acceptable documentation.

Out of warranty repairs will be performed at the prevailing service industry rates and charges.

This warranty gives you specific legal rights, and you may also have other rights which vary from state to state.
